A GUIDE TO
ACHIEVING THE
2030 GOALS
# Table of Contents

## Introduction
- A Guide to Achieving the 2030 Goals 1

## Energy
- Energy 3
- Climate and Site Characterization 4
- Envelope Design 5
- Enhanced Glazing 6
- Daylighting 6
- Lighting 7
- Mechanical System Design 7
- HVAC System Selection 8
- Demand Control Ventilation 8
- Variable Capacity Heat Pump Systems 9
- Radiant Heating/Cooling 9
- Economizers 9
- Whole Building Metering 9
- Fault Detection and Diagnostics 10
- Plug Load Controls 10
- Operator Training and Documentation 10

## Water
- Potable Water 11
- Metering 12
- Leak Detection/Keeping Updated Records 12
- User Education 12
- Fixtures 13
- Outdoor Water Use 13
- Cooling Towers 14
- Operation and Maintenance of Chillers 15
- Onsite Alternative Water Sources 16
- Rainwater Harvesting 17
- Treated Gray Water 18

## Stormwater
- Stormwater 19
- Pollution Prevention 20
- Permeable Pavement 20
- Bioretention 21
- Swales (Biofiltration) 21
- Soakaways and Infiltration Chambers 22
- Perforated Pipes (perforated stub out connections) 22
- Green Roofs 23
- Landscape Alternatives 24
- Compost and Mulch 24
- Tree Canopy 24
- Xeriscaping 24
- Precast Tree Planters/Bioretention Planters 24
- Proprietary Tools 24

## Transportation
- Transportation 25
- Starting a Building Commute Program 25
- Bike Racks, Lockers, and Showers 26
- Smart Parking Management Strategies 26
- Parking Pricing 27
- Information Hubs 27
- Car Sharing 27
- Electric Vehicles 27
- Transportation Demand Platform 27
