

ANN ARBOR 2030 DISTRICT

Commitment Letter

Community Stakeholders

The Ann Arbor 2030 District is a private sector-led effort utilizing collaboration, incentives, and shared resources to prove the business case for sustainability. Property owners will not be required to achieve the goals of the District by legislative mandates, or as individual buildings. Rather, we will do so collectively because full participation in the Ann Arbor 2030 District brings collaboration, shared resources, and financing options that will make high-performance buildings the most profitable building type in Ann Arbor. By providing my signature below, I am expressing our company's commitment to be an active member of the Ann Arbor 2030 District. We agree to support the goals of the Ann Arbor 2030 District on a district-wide scale.

As a **Founding Member Community Stakeholder**, we agree to maintain membership in the Ann Arbor 2030 District through 2030 and support the District performance goals with the following actions:

Sharing of the following information with the Ann Arbor 2030 District:

- > Opportunities and strategies in building energy use, water use, and transportation mitigation planning and data management
- > Best practices and lessons learned for shared case studies
- > Challenges in making further improvements
- > Mentorship for property owners, managers, and developers
- > Education and training information in your area of expertise

Expanding participation of properties:

- > Your local facility is District member
- > At least one (1) new property associated with your organizations added to District membership each year

Mutual partnership in promotion of resources*:

- > Program participation available to District Partners
- > Services available to District Partners
- > Cross promotion of events

List specific partnership resources (describe i.e. co-branding, program incentives, interested membership)
