

# TORONTO 2030 DISTRICT PARTNER COMMITMENT LETTER

## Service Provider Partners

### What is the Toronto 2030 District?

- A **private-public initiative** committed to achieving a low-carbon future for Toronto's downtown core
- A **broad network** comprised of property owners and managers, tenants, utilities, government, service providers, and civil society
- A **member of 22 Districts** in cities across North America working to achieve the Architecture 2030 Challenge targets
- We aim to improve conservation effectiveness through collaboration, better data, and industry leadership

### Our 2030 Goals

- Existing buildings:
  - Reduce building-related energy use, water consumption, and transportation emissions by 50%
- New construction:
  - Carbon neutral buildings by 2030
  - Water consumption and transportation emissions 50% below District baseline

### Why Districts?

- A defined geographic area creates a sense of identity and allows for recognition of the community for its efficient practices, sound economic investments, and market leadership.
- A District approach recognizes that every property is unique and that each may contribute to the overall goals in its own unique way.
- District-scale thinking, and aggregated goals also allow for broader support for discussions of shared infrastructure, policy, and programs that meet the needs of the building community in the heart of Canada's largest city.
- District partners understand that by working collectively, they are improving their own assets and increasing the entire District's value in the eyes of the community, tenants and investors.

### Our Priorities

1. **Quantify.** Develop and disseminate a better understanding of District energy, water and carbon emissions to inform more strategic program development, more meaningful stakeholder outreach, and better policy.
2. **Connect.** Act as a catalyst, connector and advisor to accelerate the adoption of best practices, conservation program participation, and knowledge transfer within the District.
3. **Collaborate.** Convene key stakeholders in the local building sector to help create a more effective building conservation community across all building types in the District.
4. **Mobilize.** Work with District stakeholders to identify systemic barriers to conservation and provide platforms and tools for collective action to overcome them.

## Service Provider Partners

### Become a Partner in the 2030 District

2030 District Service Provider Partners include architects, engineers, suppliers, manufacturers and other providers that deliver services in the 2030 District boundaries.

By becoming a partner in the 2030 District you acknowledge:

- The importance of reducing District-wide greenhouse gas emissions;
- That being part of a high-performance District has benefits for all District stakeholders;
- That no one organization or sector can get there alone. We need collaborative, community-wide solutions; and
- That your company is part of the solution and will work to reduce emissions as you are able.

The Toronto 2030 District is an inclusive initiative open to any service provider stakeholders in the District boundary and there is no cost to join.

### What you get

- Recognition for your leadership as a Service Provider Partner in the 2030 District.
- Opportunities to showcase your expertise and solutions for conservation in 2030 District programming.
- Input into 2030 District advocacy and program development.
- Opportunities to participate in research and pilot programs in support of low-carbon development.

### What we expect

2030 District Service Provider Partners:

- Support and promote conservation and GHG reduction in downtown Toronto.
- Are willing to periodically share best practices and lessons learned in the interest of improving the industry capacity.
- Provide strategic input into District consultations aimed at overcoming systemic barriers to conservation.
