

ALTURUS

Energy-as-a-Service

Providing strategic infrastructure advisory, energy management and comprehensive financing services to the Fortune 1000

Eliminate CapEx | Generate Savings | Reduce GHG Emissions

No capital expenditure: Energy Service Agreements (“ESA”) is an off-balance sheet financing solution that allows customers to implement energy and efficiency projects with zero capital expenditure

Immediate savings: The price per unit of savings is set below Customer’s current utility price, resulting in an immediate reduction to operating expenses

Scalable to achieve sustainability, ESG, and CO2 reduction goals: Enables an enterprise-wide energy infrastructure upgrade program to green operations, drive savings and improve outcomes

No risk to customer: Customer bears no project performance risks because performance risk is borne by the project investor and the contractor

Turnkey delivery: Alturus funds all project development, construction, and maintenance costs in addition to performing measurement and verification and asset performance reporting

Alturus Project Types

Energy management

HVAC upgrades, replacement

Lighting upgrades

Combined heat and (CHP) power plants

Renewable energy

Battery energy storage systems

Refridgeration systems

Water conservation retrofits

Fuel cells systems

Pumps and motors

Alturus Process

1. Identify

Capture data on existing energy strategy, usage, sustainability, and operational goals

2. Optimize

Rank opportunities based on equipment upgrade needs and pending initiatives

3. Develop

Engineer, design and install facility infrastructure upgrades

4. Deploy

Fund, own, operate and maintain the project equipment long-term
