PROGRAM SUMMARY

• Lighting Program
• Traffic Signal Lighting
• HVAC Program
• Food Service Program
• Appliances Program
• Consumer Electronics Program
• Agricultural Program
• Custom Programs
• Data Centers Program
• Retro-Commissioning Program
• Facility Audits Incentive Program
LIGHTING PROGRAMS

- **Lighting Incentives for Business Program**
  - Retrofit and New Construction projects are eligible for incentives
  - Prescriptive & Performance based incentives are offered for installing LED lighting fixtures, lamps, retrofits, and controls
  - Incentives limited to the total equipment cost
  - All LED equipment must be DLC or Energy Star listed

- **Traffic & Pedestrian Signal Program**
  - Flat-rate incentives are offered by converting lighting technologies, which may include: LED round signals, LED pedestrian signs
  - Incentives are limited to the total equipment cost
Prescriptive incentives are offered for a wide variety of HVAC equipment.

Equipment must meet or exceed HVAC program guidelines.

All HVAC incentive applications will require pre-approval.

Incentives are capped at total equipment cost.

Equipment must be new.
Prescriptive incentives are offered for a wide variety energy efficient food service equipment

- Equipment must be ENERGY STAR® certified
- Only new equipment is eligible
- Incentives are capped at the total equipment cost
- Prescriptive incentives are offered for energy efficient equipment
- Equipment must be ENERGY STAR® certified
- Only new equipment is eligible
- Incentives are capped at the total equipment cost
Prescriptive incentives are offered for energy efficient equipment

- Equipment must be ENERGY STAR® certified

- Only new equipment is eligible

- Incentives are limited to the total equipment cost
Prescriptive incentives are offered for high-efficiency agricultural equipment related to milking, cooling, ventilation equipment

Only new equipment is eligible

Incentives are capped at the total equipment cost

- Automatic Milker Takeoffs
- Dairy Scroll Compressors
- High-Efficiency Ventilation Fans
- High-Volume Low-Speed Fans (HVLS)
- Livestock Waterer
- VFD for Milk Vacuum Pump
- Dairy Parlor Heat Reclaimers
Performance incentives are offered for projects that do not meet the eligibility criteria for other business programs.

- Incentives are offered for Variable Speed Drives (VSDs)
  - Current incentive rate is $50/hp controlled
- Incentives are offered for premium efficiency Three Phase Motors
  - Current incentive rate is $20/hp
- Current performance incentive rate: 5 cents per kWh saved annually
- Incentives capped at **50 percent of the total project cost**
Performance incentives are offered for Custom Buildings projects that do not meet the eligibility criteria for other programs.

Custom Building projects include replacement of existing roof with reflective coating, upgrades, building automation control system installation, smart thermostats.

Current incentive rate: 5 cents per kWh saved annually.

Incentives are limited to the total project cost.

Note: Program eligibility requires the project to achieve a minimum savings of 20,000 kWh/year.
LOW TO NO COST EXAMPLES FOR INSTITUTIONS AND INDUSTRY

- Compressed Air Leak Audits
- Chiller scheduling in summer for schools
  - Reduce operation during summertime off periods
- VFD and premium efficiency motor upgrades
  - Cooling towers, pumping control, chiller retrofits
- Turn process motors off during down periods
  - Breaks and lunch or line shifts.
  - Incorporate sensors and VFD’s into process control
- Incentives are offered for data center facilities which house IT equipment for data processing, data storage, and communication networking
- Server closets or computer training areas are not eligible
- Projects may include: server virtualization, high efficiency power supplies, automation system installation, high efficiency computer room air conditioning
- Incentives are limited to 50% of the total equipment cost
Projects may include:
- adjustments to lighting and HVAC equipment operating schedules
- central plant optimization
- re-commissioning of compressed air system controls

All incentive requests are subject to review and pre-approval by the program staff prior to the audit work.

Incentives are capped at 50% of the total equipment cost.
Intended to encourage customers to acquire a detailed ASHRAE Level II third party energy audit for their buildings or process systems.

Incentives will be capped at 50 percent of the audit cost or $2,500, whichever is less for SCI Customers (rate code GS and GSD) and 50 percent of the audit cost or $10,000 for LCI customer (rate code GP, GSU, and GT) upon completion of a qualifying audit.

Additional Audit Incentives will be paid for installation of qualifying audit-recommended measures that are installed within 18 months of the audit completion date but no later than December 31, 2019. The bonus incentive will be $0.05 per kWh saved not to exceed 50 percent of the remaining audit cost or $2,500 for SCI and $10,000 for LCI customers.
