| LIGHTING      | • Per-unit incentives are available for technologies such as linear fluorescents, fixtures, LEDs, and LED exit signs.  
               | • Lighting equipment that does not meet the requirements of the prescriptive program may be incentivized on a cents per kilowatt-hour (kWh) performance basis. | • Incentives are capped at total equipment cost (excluding taxes).  
               |                |                                                                                       | • See the program website for more details regarding specific requirements for each technology. |
| HVAC          | Flatrate per unit or per-ton capacity incentives are available for:  
               | • air conditioners  
               |                | • water-cooled electric chillers  
               | • heat pumps  
               | • PTAC/PTHP    | HVAC equipment must be for ambient cooling applications only and must meet or exceed the minimum efficiency rating required for the equipment type and cooling capacity.  
               |                |                                                                                       | • Only new equipment is eligible for incentives. |
| CUSTOM BUILDINGS | Custom building projects include building shell and systems improvements (windows replacement, addition of insulation, roof replacement, etc.) that reduce energy consumption and demand by improving building energy performance.  
               | Custom building projects are offered an incentive on a cents per kilowatt-hour (kWh) performance basis. | Projects must meet minimum annual energy savings of at least 20,000 kWh/year.  
               |                |                                                                                       | Incentives are limited to 50% of the total project cost. |

Unless otherwise noted, pre-approval is required prior to purchasing equipment to ensure it meets program requirements and is eligible for incentives.

| CUSTOM EQUIPMENT                | • Custom equipment projects are eligible for incentives on a cents per kilowatt-hour (kWh) performance basis.  
• Per-unit incentives are available for variable speed drives and three phase motors. | • Incentives are limited to 50% of the total project cost, including labor.          |
| APPLIANCES & ELECTRONICS        | Per-unit incentives are available for ENERGY STAR equipment such as:  
• commercial clothes washers/dryers  
• refrigerators & freezers  
• heat pump/solar water heaters  
• window AC units  
• pre-rinse spray nozzles  
• UPSs & and office equipment | • Incentives are capped at total equipment cost.                                     |
| FOOD SERVICE EQUIPMENT          | Incentives are available for ENERGY STAR equipment such as:  
• ice machines  
• commercial reach-in refrigerators/freezers  
• refrigerated display cases/walk-ins  
• electric combination/convection ovens, steam cookers and other select food service equipment  
• anti-sweat heater controls & vending machine controls | • Incentives are capped at total equipment cost (excluding taxes).  
• Only new equipment is eligible for incentives.                                      |
| MUNICIPAL TRAFFIC LIGHTING      | Incentives are available on a fixture basis for converting to 8” & 12” LED round & turn arrow traffic signals, and on a fixture basis for 9”, 12”, & 16” pedestrian signals. | • Incentives are capped at total equipment cost (excluding taxes).  
• Only new equipment is eligible for incentives.                                      |

All programs are subject to change without notice - Incentive-Pricing is variable

Costs of this program may be recovered through customer rates in accordance with Ohio law.
