

2030 DISTRICT™

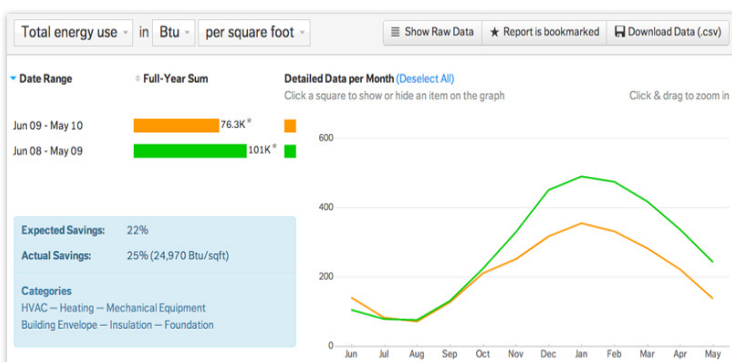

wegowise

WegoWise has partnered with Architecture 2030 and 2030 Districts

to provide utility tracking and analytics to District members. With WegoWise you can track your building's water, electricity and natural gas use all in one place. WegoWise's online software does all the work, with no hardware installation required.

Benefits of WegoWise:

- Automatically import consumption and cost data from your utility companies.
- Export data to Portfolio Manager for Energy Star ratings.
- Monitor and analyze building performance through clean and intuitive visualizations.
- Measure and verify the effectiveness of building retrofits.
- Track your building's performance against your 2030 District's goals.
- Share your building information with your organization and with external partners.

How do you stack up?

Call to schedule a free demo of the WegoWise software today.

The first 10% of a District's building square footage receives free WegoPro accounts for the first year.
